The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Horie et al. (US 6,323,765) discloses a tire pressure abnormality alarm where the rotation angular speed is detected and rotational angle is calculated to determine the status of the vehicle and the location of each of the tires.

Starkey et al. (US 6,518,877) discloses an antenna, magnet, and sensor located on a vehicle wheel where the sensor determines tire condition, the magnet creates a magnetic field to create energy for data transmission, and the antenna makes optimum use of a transmission window to transmit tire condition data.

Church (US 3,835,451) discloses a transmitter and receiver that communicate tire condition data upon an angular tire rotation.

Niekerk et al. (US 6,463,798) discloses a tire condition communication system that includes a RFID tag located on a tire where the tag includes a coil that establishes an electromagnetic field upon the rotational speed of a tire and sends tire condition data to an RFID receiver located on a vehicle wheel well.

Brown (US 6,591,671) discloses an antenna, magnet, and sensor located on a vehicle wheel where the sensor determines tire condition, the magnet creates a magnetic field to create energy for data transmission.
